Art Unit: 1616

I. Rejection of claims 8-13 under 35 U.S.C. 102(b) as being anticipated by Valentin will be maintained for reasons on record and reasons as follows. New claims 17-19 are added to this rejection.

Applicant's arguments filed 11/28/01 have been fully considered but they are not persuasive.

Applicant argues while the reference suggests the use of the instant method in agricultural applications, there is no teaching of the highly beneficial results obtained in accordance with the instant invention. Examiner argues that the results would have been the same for the prior art invention and instant invention since both inventions involve the application of metal lipoamino acids to crop.

II. Rejection of claims 8-14,16 under 35 U.S.C. 102(b) as being anticipated by DeMil will be maintained for reasons on record and reasons as follows. New claims 17,18 are added to this rejection.

Applicant argues that DeMil teaches nothing about increasing crop yields or protecting crops against viruses, microorganisms, and destructive animals. Examiner argues that is inherent that the prior art invention would have provided crop with increased yield and protection since prior art teaches a method of applying metal lipoamino acids to crop.

III. Rejection of claim 15 under 35 U.S.C. 103(a) as being obvious over DeMil will be maintained for reasons on record.

Art Unit: 1616

III. Claim Rejection under 35 U.S.C. 112, 2nd paragraph

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are: What object is the copper salt being applied to?

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
